Storyboard

- Ben Bitdiddle comes into 6.170 lecture
- He's had an exhausting week
- Today's lecture: structuring a database
 - What is mongoose???
- He couldn't keep up with lecture

Concepts

- **Snippet:** a note for a certain topic in a lecture
- **Feed:** a student's individual snippet list for a lecture
- **Lecture feed:** a consolidation of all attendees' feeds
- **Rating:** an individual snippet's score, voted on by attendees
- **Flag:** a mark indicating that a user thinks a snippet is incorrect
- **Unlocking:** snippets are hidden until user contributes enough

Risks and Mitigations

Too many notes	Rating systems
Lazy students skip class	Must contribute to view
Low user count	Good for individual note managing too
Students sabotaging notes	Moderation (flagging)

thanks!
