Storyboard

- Ben Bitdiddle comes into 6.170 lecture
- He's had an exhausting week
- Today's lecture: structuring a database
 - What is mungooz???
- He couldn't keep up with lecture

Concepts

- **Snippet:** a note for a certain topic in a lecture
- **Feed:** a student's individual snippet list for a lecture
- **Rating:** an individual snippet's score, voted on by attendees
- **Flag:** a mark indicating that a user thinks a snippet is incorrect
- **Unlocking:** snippets are hidden until user contributes enough

Risks and Mitigations

Too many notes	Rating systems
Lazy students rely only on notes, skip class	Must contribute to view
Low user count	UX good enough for individuals to be happy using app for themselves
Students sabotaging notes	Moderation (flagging)

thanks!
